I should like to wish Carol Harwood a speedy recovery as this was initially her appointment.

A super entry and thank-you to for the sportsmanship on applause for each class. Always a pleasure to Judge this my first breed , I still strongly hold the belief that this breed should be capable of trotting for miles behind a horse and carriage therefore what is needed is athleticism and stamina on a correct construction and muscle formation , today I found far too many overweight and a distinct lack of muscle with poor close hind action only exaggerated by fast incorrect gaiting on the handlers part , RUNNING a dog at speed does not enhance the natural trotting action it will only spoil any natural cadence the dog may have . I made ample use of a good sized ring and the slight slope back on the return highlighted to me dogs that were capable and fit enough to hold their own front balance and display a driving action on the way out. A few shy ones today that needed more ring training to aid their confidence , this not the temperament I recall in this breed also please think on your choice of leash , an ultra thin tight lead made a few panic today , train and watch the best handlers in your breed, their dogs are free standing on a loose leash allowing their dogs to shine and be at its best natural uncomplicated self.
